Art Unit: 3728

1. Claims 1-5, 34 and 35 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 6/30/2006. The traversal is on the ground(s) that “a search for either the apparatus or the method would likely encompass a search for both. As the search effort would thus be the same, the Office ... multiple patents” and “Applicant expressly makes no admission, however, that art teaching the apparatus would render obvious the method (or vice versa) ... distinct”. They are not found persuasive because the inventions are independent and distinct from each other and because examination of each invention will necessitate disparate searches which would clearly pose a burden as clearly shown by the examiner in the requirement. Applicant is not entitled to examination of multiple independent inventions in one application.

The requirement is still deemed proper and is therefore made **FINAL**.

Election/Restriction

2. After further reconsideration of the elected invention, this application contains claims directed to the following patentably distinct species of the claimed invention:

Group A: The species of a cover as shown in Figures 2A-2E.

Group B: The species of a cover as shown in Figure 3.

Group C: The species of a cover as shown in Figures 4A-4B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 33 is generic.

Applicant is advised that a reply to this requirement **must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added otherwise the reply is considered improper.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
